

VIDEO INDOOR STATION
WITH TOUCH DISPLAY
SKYLINE:TEN BASIC

TACT FOR VISITORS SKYLINE:TEN BASIC

A pleasure for your tactile sense. The 10.1 inch touch display is ready for operation via gesture control - in the same manner as with a tablet or smart-phone. Additionally the device is equipped with speed-dial keys and easy-to-understand symbols. Sound, pictures and videos can be recorded in the internal memory. Due to the individual photo gallery, the display can be used as a digital picture frame. For mobile applications such as e-mail, calendar or browser, LAN and Wi-Fi are integrated.

Touch display with 25.6 cm (10.1") diagonal

Resolution 1280 x 800 pixel

Intuitive touch operation

4 speed-dial keys

Integrated SD card reader to transmit image and sound files

TCS memos can be received

Digital picture frame with background music

Integrated LAN and Wi-Fi

For flush-mount (flush-mount box with 39 mm depth)

The new all-rounder at your door

The skyline:ten BASIC is a modern video indoor station with large 10.1 inch touch display. Its plenty of functions as well as the technical extension possibilities forms a high-performance communication central in offices or practices. Thus, besides door communication and video surveillance up to 20 internal call destinations can be stored and 20 control functions can be triggered.

Due to its low height of only 10 mm the indoor station fits seamlessly into the interior. In addition to that, the anodised aluminium housing is available in silver or black. The installation is implemented easily via the TCS:BUS. For an easy home network integration LAN and Wi-Fi interfaces are already integrated components. Easy to understand symbols ensure a comfortable operation as well as commissioning and configuration by a qualified electrician.

Entrance Highstreet

Video surveillance with a PTZ camera
Whether in the flat, in the house or in the office - with the video indoor station skyline:ten BASIC video door communication is now even more safe. A specific camera selection ensures more protection due to video surveillance of indoor and outdoor areas. Even adjacent and opposite sides of a building can be monitored with a suitable PTZ camera.

More comfort at the door
The skyline:ten BASIC can receive TCS memos that were sent centrally via the TCS:BUS. For example information of the landlord or the manufacturer. In combination with pre-installed Apps the indoor station displays the Google calendar, current weather reports and even E-Mails. Via browser websites can be accessed. With the TCS:App for Smartphone or tablet as well as an additional IP-Gateway within the TCS:BUS system door communication via Wi-Fi is feasible.

TOUCH DISPLAY
10,1 INCH (25,6 CM)

1:1

original size

The perfect frame for your pictures

With the digital image frame of the video indoor station skyline:ten BASIC you can view your holiday photos when entering your home. Via the included SD card, all standard image formats can be displayed. Additionally, individual background music can also be played. When a door call comes in, the gallery function is interrupted and the door communication can be operated as usual.

Intuitive operation and installation

Via short-dial keys a variety of functions can be triggered, such as operating the door communication, ring tone mute, call diversion, internal calls, door release automatic, light switch function and others. Further control commands can trigger switching functions at actuators - for example the drive of garage doors, entrances or the outside light.

EVERYTHING AT ONE GLANCE

- 1 Date, time and location-bound weather information
- 2 Status and news line (e.g. Call OFF, Door release automation, Call diversion, TCS-memos)
- 3 Short keys, freely selectable out of the general menu
- 4 Menu line (menu, video surveillance, browser, e-mail, calendar and call list)
- 5 Direct call keys (Home, Back, Call OFF and Central)

Call list
List for door and internal calls, memorised images, videos and audio files

News
Reception of TCS-memos

Digital frame
with individual background music (mp3)

Calendar
Calendar function through already installed calendar app
